## *Introduction*

“The passion of Nikhil Tiwari, lies behind the establishment of Topstona on the strength of the experience of a family-run business boasting 20 years of history. The encounter with various designers marked the company’s styling brand”.

“The main ingredient for the success of Topstona is obviously stone. Indeed, the Company chose to work only with natural stone, and in particular with limestones, sandstones and marbles, and also use agglomerates and manufactured or synthetic stones. Like all other natural materials, the appeal of stone is linked to its uniqueness, a feature which is further emphasised by the unusual merger with industrialisation processes and mass production. Every model comes to life in the Topstona design laboratory in collaboration with various designers, the type of marble is chosen, technology is plied to achieve a perfect marriage with stone and to reveal its most hidden beauty, at times performing additional research in areas other than stone design, such as lighting technology. The result is an unprecedented offering of modular architectural solutions that are ready for use, created in the most durable natural material used by man with highly environment-friendly processing techniques. Solutions that are at the complete disposal of architects and designers, and that the best international design firms are choosing since the very beginning of our story.”
